PROFESSIONAL SUMMARY

Full Stack Developer with 1+ year of experience engineering enterprise applications using Java, Spring Boot, and Angular. Currently contributing to an enterprise Bloomreach CMS platform migration at LTM for banking client Nordea, executing Java 17 / Spring Boot 3 stack modernizations and RESTful API development. Experienced in Agile delivery, dependency conflict resolution, and enterprise system upgrades. Focused on delivering secure, maintainable software solutions aligned with banking-grade engineering standards.

TECHNICAL SKILLS

Languages: Java (Core Java, Java 11/17/21), TypeScript, JavaScript, HTML5, CSS3, SQL, C++

Backend Frameworks: Spring Boot 3 (upgraded to 3.4), Spring MVC, Spring Framework (5.3 to 6.2), Spring Data JPA, Hibernate, Node.js, Express.js

Frontend Technologies: Angular, TypeScript, HTML5, CSS3, JavaScript, Bootstrap, Angular Material Design

Databases & Data: PostgreSQL, MySQL, MongoDB, Database Design

Security & Auth: Spring Security, SAML Single Sign-On (SSO), OAuth 2.0, JWT Authentication, Role-Based Access Control (RBAC), Secure Coding Practices

Microservices & APIs: RESTful APIs, Microservices Architecture, Event-Driven Architecture, API Integration

Messaging & Integration: Apache Kafka

Cloud & DevOps: Microsoft Azure (project experience), Azure DevOps, Docker, Jenkins, CI/CD Pipelines, GitHub, GitLab, Maven

Testing Frameworks: JUnit, Mockito

Developer Tools & AI: IntelliJ IDEA, VS Code, Postman, Git, Maven; GitHub Copilot, ChatGPT, Claude, Gemini, Cursor AI

Core Concepts: Object-Oriented Programming (OOP), Design Patterns, System Design, Data Structures & Algorithms, Dependency Management

PROFESSIONAL EXPERIENCE

Full Stack Developer | **LTM** Pune, Maharashtra | **Nov 2025 – Present**

Account: Nordea | Project: NLPDK – Bloomreach CMS Migration & Enhancement

- Maintain and enhance NLPDK, an enterprise headless Bloomreach CMS platform for banking client Nordea, managing digital content, campaign components, and promotional banners to support business delivery objectives.
- Executed the Bloomreach CMS platform upgrade from v15 to v16, resolving legacy dependency conflicts and updating library configurations to achieve stable builds, zero-downtime deployment, and adherence to change management protocols.
- Upgraded the enterprise application stack from Java 11 to Java 17 and Spring Boot 2.5.2 to 3.4 (Spring Framework 5.3 to 6.2), improving runtime performance, scalability, and platform maintainability.
- Implemented SAML-based Single Sign-On (SSO) using Spring Security across distributed microservices, establishing centralized enterprise authentication aligned with OAuth 2.0, JWT, and API security best practices.
- Transitioned containerized database connectivity from static username/password credentials to Microsoft Entra ID authentication for Azure Database for MySQL, eliminating credential exposure and bolstering enterprise cloud security.
- Migrated all legacy javax package dependencies to Jakarta EE namespaces, ensuring full compatibility with Spring Framework 6 and Jakarta EE 10 standards while safeguarding secure coding practices.
- Designed and maintained RESTful APIs adhering to microservices architecture principles, ensuring robust backend data exchange across distributed services and cross-functional teams.
- Collaborated actively within an Agile delivery team, participating in sprint planning, backlog grooming, peer code reviews, and technical documentation to enforce engineering quality standards.

Full Stack Developer Trainee | **LTM** Mumbai, Maharashtra | **Jun 2025 – Sep 2025**

- Completed intensive full-stack engineering training covering Core Java, Spring Boot, Angular, and MySQL, building two end-to-end applications from scratch.
- Engineered **JobFinder**, a full-stack portal featuring JWT authentication and Role-Based Access Control (RBAC); developed RESTful APIs for candidate profiles and application tracking alongside an administrative management dashboard.
- Engineered **WiZone**, a Wi-Fi management system featuring JWT-secured RESTful APIs, role-based dashboards, and Chart.js analytics; built user workflows for plan requests, verification document uploads, and approval lifecycles.
- Built responsive user interfaces and integrated frontend components with backend services using Angular, TypeScript, and Bootstrap; utilized Docker containerization basics and automated CI/CD workflows.
- Developed unit and integration tests using JUnit and Mockito to validate core business logic, ensuring code reliability, testability, and maintainability.

EDUCATION

Master of Computer Applications (MCA) **2023 – 2025**
Graphic Era (Deemed to be University), Dehradun, Uttarakhand **CGPA: 8.77**
